

Os - Win 11

Application - 1) OneDrive- 22.196.0918.0001

CCleaner version - 2) CCleaner Free/Pro Build Version - v6.04.10086

Test Case

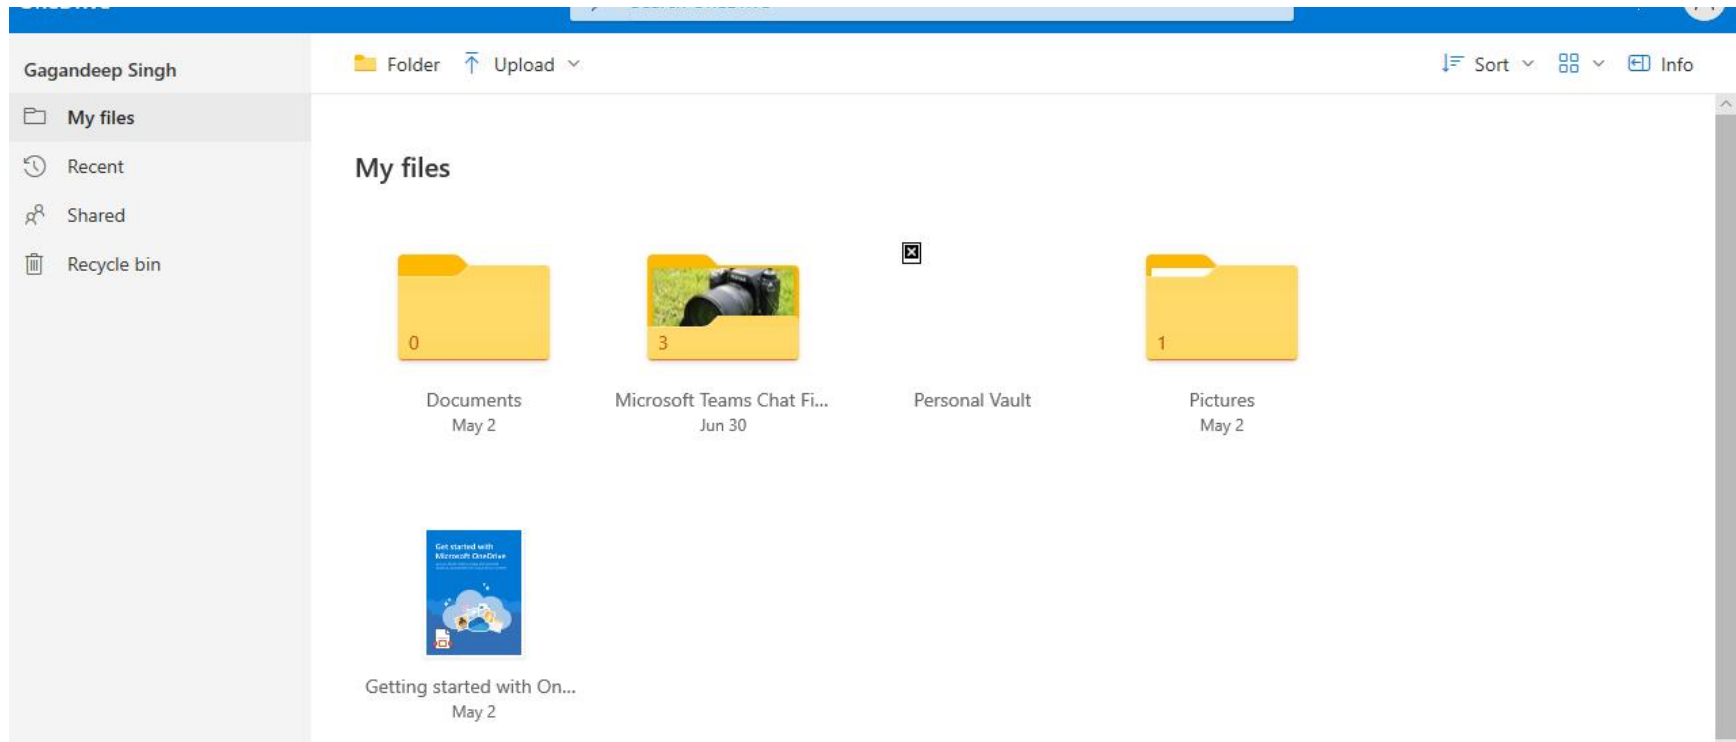

To verify that the files cleaning feature is cleaning the files from the defined path of OneDrive through Custom Clean and Health Check.

In Health Check we have to follow Step 1 for Custom clean and rest onwards we have to follow this step-
Go to CCleaner Health Check Section click on Start and it would clean the files listed out like System files for OneDrive

Step 1

Install OneDrive in Windows , sign in with your Microsoft account and select a few files and upload them. This would generate the files to be cleaned.

Screenshot 1

Search and upload the files of your choice.

Step 2

Open CCleaner APP > Custom Clean > Applications TAB > Applications> MS OneDrive
